

# MAKE YOUR OWN TOYS TOOLKIT

This week we are learning about the importance of reusing and recycling. This week's toolkits will be templates that will require you to reuse a common household item to complete the toy. The lessons for the week will include 'Did you know' facts about why cartonboard is a sustainable packaging material.

## WHAT YOU WILL NEED:

Printer

Scissors

Paper

Glue

Colour Pencils

Kitchen/Toilet  
Roll Tube

## MAKE YOUR OWN :

Rocket

## DID YOU KNOW:

More than 90% of European board mills have combined heat and power plants that provide their own energy.

## HOW TO MAKE:

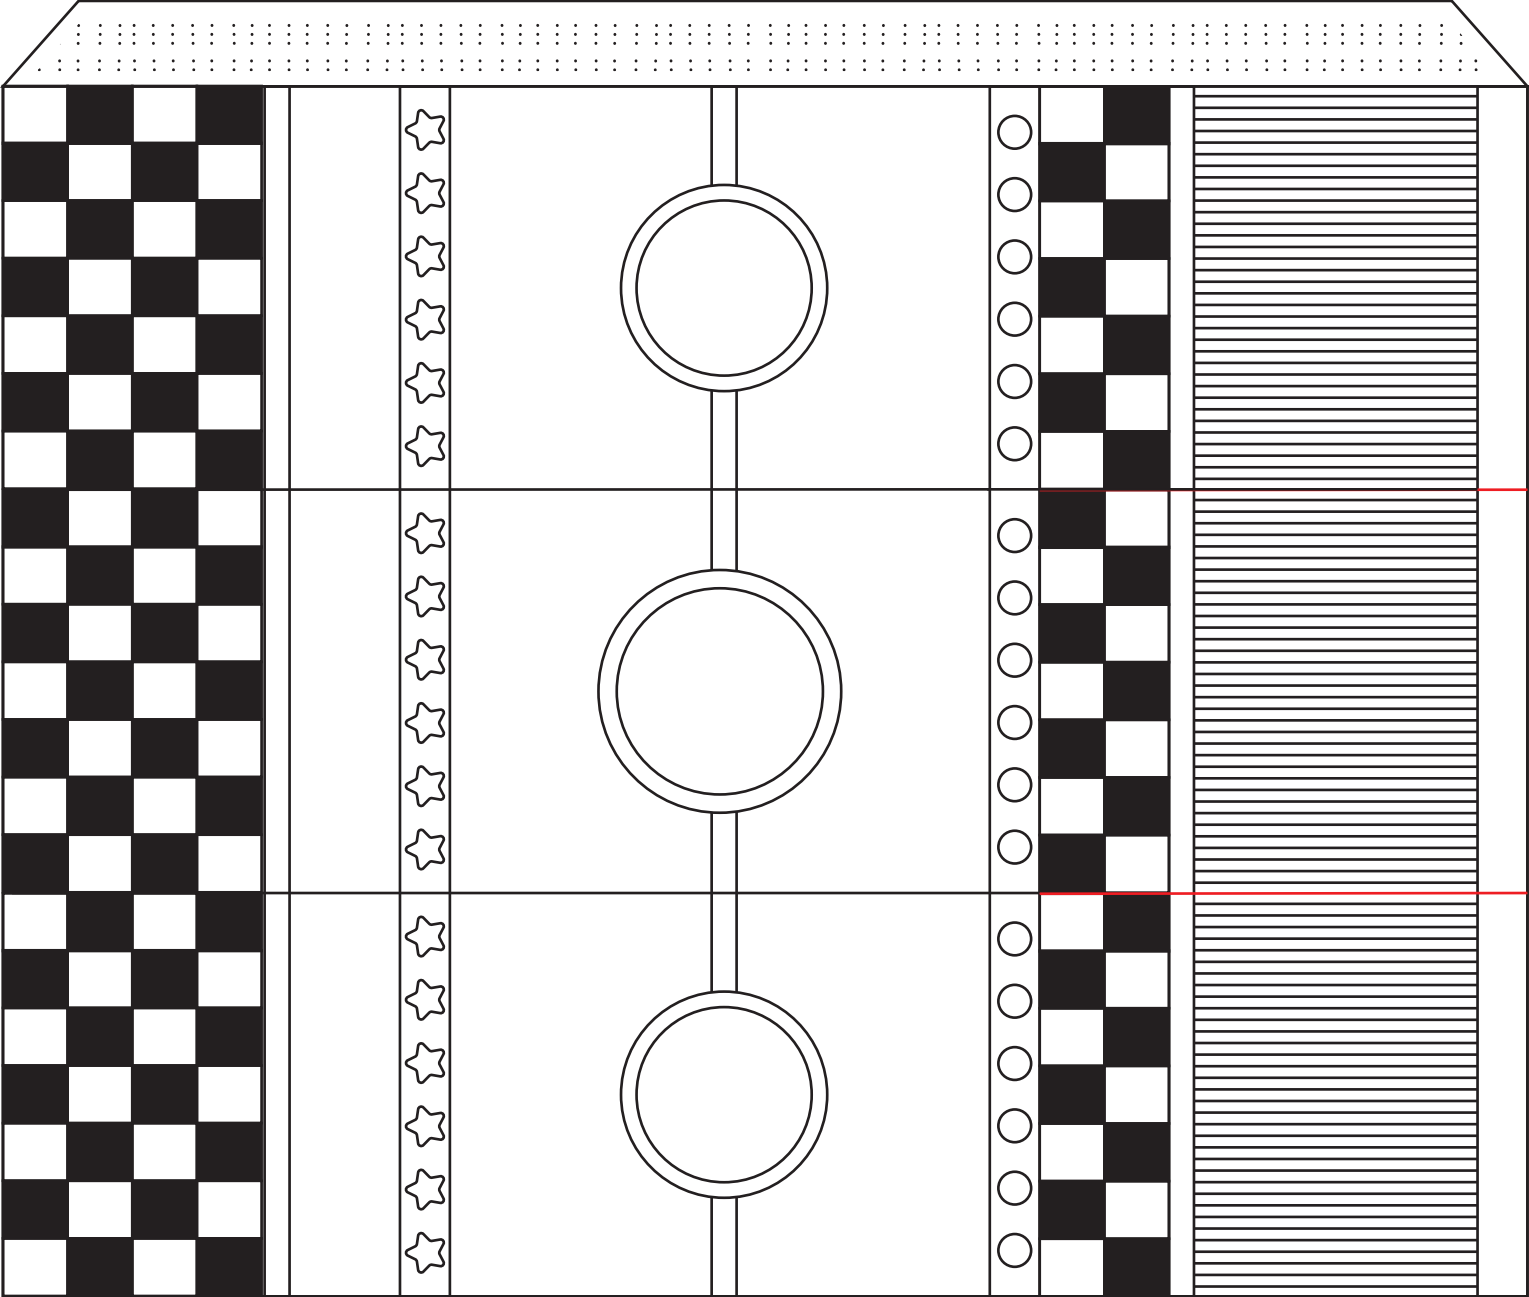

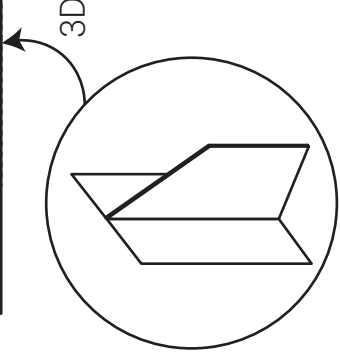

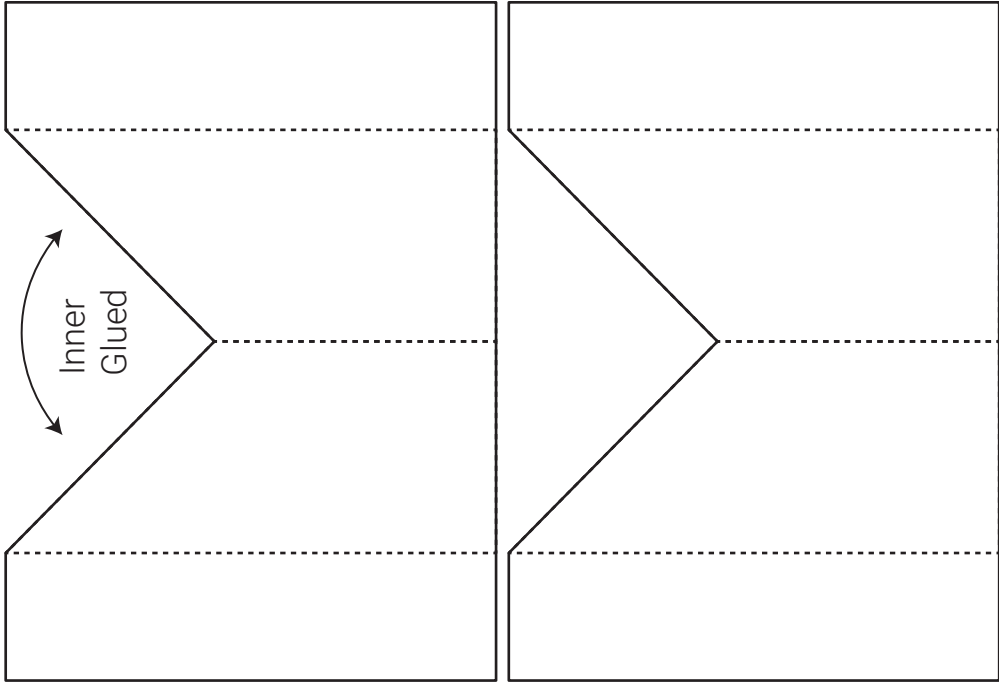

You can choose whether you want to colour in your own design or use the one that has already been coloured-in by our graphic designer!

1. If you are using Toilet Roll, glue/tape two Toilet Rolls on top of each other.
2. Cut out the PDF and glue the inner parts of the rocket stands as shown in the 3D diagram.
3. Wrap the main Rocket design around your Kitchen/Toilet roll tube, cut the design to fit and glue it onto your Kitchen/Toilet roll tube.
4. Cut the two red lines on the main design, to create two slits on your tube.
5. Insert the rocket stands into these slits.
6. To create the rocket top, glue and stick the glue flap on the rocket top design. Glue this to the top of your rocket tube.
7. Decorate your rocket.
